

## Australia Recommendations (ECS ID-300)

The nine regions contained in the Australian submission (from Australian Executive Summary).

### 5. Macquarie Ridge

The Macquarie Ridge extends north and south from Macquarie Island. The ridge complex consists of a series of segments of steep sided ridges and trenches. The ridge segments to the south of the island are interconnected across two saddle areas, which rise 2000 m and 700 m above the deep ocean floor, respectively.

Relationship between the 200 M limit (green) and the FOS points (red dots and stars) and formula lines (burgundy) (from Australian Executive Summary).

The Commission accepted the FOS points and formula lines (apart from join to the 200 M EEZ of Australia).
