

Australia Recommendations (ECS ID-300)

The nine regions contained in the Australian submission (from Australian Executive Summary).

6. Naturaliste Plateau

The Naturaliste Plateau extends westwards from the south-west coast of Australia. The plateau is connected to the shelf by a slightly deeper saddle area called the Naturaliste Trough. This saddle is 200-300 m deeper than the outer parts of the Plateau which are around 2400 m deep (2500 m above the deep ocean floor in the north and 3000 m in the south).

Relationship between the 200 M limit (green) and the FOS points (red dots and stars) and formula line (from Australian Executive Summary).

The Commission accepted the FOS points (after the modification of 5 points) and formula lines (apart from join to the 200 M EEZ of Australia).
