

Australia Recommendations (ECS ID-300)

The nine regions contained in the Australian submission (from Australian Executive Summary).

4. Lord Howe Rise

The Lord Howe Rise region is located between the Australian Continent and New Zealand. It includes the Dampier Ridge, the Middleton Basin, the Lord Howe Basin, the Lord Howe Rise, the New Caledonia Basin and the Norfolk Ridge. Lord Howe Island and Norfolk Island are located on the Lord Howe Rise and the Norfolk Ridge, respectively.

The 200 M limit (green) and the outer limit lines (pink) in the Lord Howe Rise Region adjacent to the Tasman Basin (from Australian Executive Summary).

The Commission accepted the FOS points and formula lines (apart from join to the 200 M EEZ of Australia). The landmasses of Lord Howe Island and Norfolk Island overlap with each other in the New Caledonia Basin and with the treaty lines with France in the north and New Zealand in the south. This encloses the continental shelf between Australia's 200 M and the treaty lines establishing ESC around the New Caledonia Basin.
